About AXIS

AXIS was founded 30 years ago to serve a niche market opportunity providing on-demand IT skills on an ad-hoc basis to cover shortfall in personnel / skill sets in our Customers' work force.

Today, while the size of the company and the skill sets have significantly changed, the philosophy remains unchanged. We provide personnel at very short notice to address the field based IT requirements of our Customers. These deployments may be as short as one hour, cyclic maintenance or longer term contracts depending entirely on Customer need.

Coverage

Our reach is vast - across all capital cities and key regional centres. Current count is 35 locations in Australia and 15 in New Zealand ranging from Port Headland in NW Western Australia to Dunedin on South Island of New Zealand.

Process

We operate our business with SLA's (Service Level Agreements) in place so our Clients and our people have a clear understanding of our mutual goals. This approach ensures that we arrive on time, resolve issues in a timely manner and ensure that our clients are kept abreast of our progress.
